Seeking a 4-month internship starting February 2027

PROFILE

Computer engineering student with two web development internships. I like building useful tools end to end: API, interface and automation. I want to join a product team working on web and AI.

WORK EXPERIENCE

Full-Stack Developer — Internship **02/2026 – 06/2026**
Acme Logistics *Lyon, France*

- Built a **12-endpoint REST API** (Node.js, Express) to track shipments.
- Created a React dashboard showing delivery status in real time.
- Wrote **unit tests** (Jest) and set up continuous integration with GitHub Actions.
- Took part in 2-week sprints and code reviews.

Web Developer — Summer internship **06/2025 – 08/2025**
Studio Exemple *Lyon, France*

- Turned Figma mock-ups into responsive pages (Next.js, Tailwind CSS).
- Deployed the site on Vercel and raised its Lighthouse score from 62 to 91.

EDUCATION

Engineering degree in computer science (Master's level, in progress) **09/2025 – Present**
École Exemple d'Ingénieurs *Lyon, France*

Bachelor's degree in computer science (BUT) **09/2022 – 06/2025**
IUT Exemple *Lyon, France*

- **Cours :** algorithmique, bases de données SQL, réseaux, développement web.

PROJECTS

Résumeur d'articles — LLM automation **2026**
github.com/alex-martin-example/summariser

- **Python** script that collects RSS feeds daily and summarises them with the **OpenAI API**.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Web:** Node.js, Express, React, Next.js, Tailwind CSS
- **AI & data:** API OpenAI, Pandas
- **Tools:** Git/GitHub, GitHub Actions, Jest, Docker, Figma
- **Languages:** French – native, English – professional (B2)
- **Interests:** Climbing, Photography
